Se vedlagt invitasjon. NGFs møter er åpne for alle og medlemmer kan gjerne ta med andre interesserte.

2. Foredrag på NGI

NGI ønsker velkommen til følgende foredrag:

Electro-osmotic consolidation in situ

This new method was developed, tested in situ and patented by Professor Lefebvre.

Foredragsholder: Professor Guy Lefebvre
Sherbrooke University
Quebec, Canada

Dato: Mandag 28 mai 2001
Tid: kl 1530 enkel servering
kl 1600 foredrag

Boston's Central Artery Project

The lecture will give a general overview of the project, including the immersed tube tunnel, tunnel jacking, main downtown excavation, etc.

Foredragsholder: Professor Lew Edgers
Tufts University
Massachusetts, USA

Dato: Onsdag 27 juni 2001
Tid: kl 1530 enkel servering
kl 1600 foredrag

Response of two multy-story buildings to the Central Artery excavation

The lecture presents two special case studies. The buildings (Federal Reserve Bank and One Financial Center) are supported on glacial till, and are very heavily instrumented for monitoring ground movement and building response. The excavations are about 25 meters below the foundation levels of these buildings.

Foredragsholder: Professor Lew Edgers
Tufts University
Massachusetts, USA

Dato: Torsdag 28 juni 2001

Tid: kl 1200
